

Full-service means great service with Clover

Give guests the excellent dining experience they deserve and simplify your restaurant operations with Clover. Easily control your menu, map tables, keep guest order history, manage staff and take orders tableside or online – all from a single, robust dashboard.

Accept payments anywhere

Take major credit and debit cards, checks, cash and contactless payments on-site, online and by phone.

Manage sales performance

Track what's selling and what's not with sales reporting by item, timeframe and employee.

Keep in touch with guests, say hello to new ones

Free marketing tools let you run loyalty programs, promotions, and send announcements via email or text.

Offer online ordering and touchless dine-in options

Let guests order online with a custom menu page, QR code and URL. Create a contactless on-site dining experience with QR codes that enable scanning to order and scanning to pay.

Get paid easily and run your restaurant better with Clover:

- **Tableside ordering and payment** – Save time (and minimize those errors) with Clover Flex, our mobile handheld device, to take orders and payments tableside
- **Table mapping** – Easily configure server sections right from your POS device or web dashboard
- **Best-in-class technology and security** – Keep customer and business data safe with industry-leading security
- **Clover Virtual Terminal** – Take payments by phone by securely keying in customer card information through a web browser
- **Clover Dashboard** – Track sales, access reports and manage your business through a single dashboard
